TECHNICAL GUIDE

MBS manual motor starters

MBS manual motor starters

Fuseless protection saves costs, space and ensures a quick reaction under overload and short-circuit condition by switching off the motor within milliseconds. The full range of MBS manual motor starters offers protection from 0.25 A to up to 80 A.

Protection and control

Protect equipment and installations

AEG MBS manual motor starters provide protection and control in almost every situation by protecting motor loads from short-circuits, overloads and phase failures while also controlling the current flow through a simple ON/OFF switch

Continuous operation

Secure uptime

Fuseless motor protection reduces maintenance costs and downtimes by avoiding fuse replacement after faults. Furthermore, MBS32NH and MBS63NH feature a magnetic trip indicator making troubleshooting easier.

Speed up your projects

Simplified design

MBS manual motor starters can be connected easily with AEG contactors using the respective accessory. Additionally, the main range of accessories is shared across multiple starters, making logistics and planning simpler.

MBS manual motor starters

Right solution for your application

MBS32NG offers protection up to 32 A and a breaking capacity up to 50 kA – all in a 45 mm wide housing. They are designed to meet requirements of most standard applications.

Troubleshooting made easy

MBS32NH and MBS63NH feature a magnetic trip indicator. This way, every tripping event will be distinguished, making troubleshooting a lot easier and faster.

All-in-one

MBS manual motor starters offer fuseless protection against short-circuits, phase failures and overloads including disconnect function – all in one single compact product.

High performance in compact size

MBS32NH and MBS63NH cover short-circuit breaking capacities up to 100kA. In addition, every manual motor starter is temperature compensated up to 60°C.

Protection wherever you are

MBS manual motor starters are suitable for worldwide use. The wide range of certifications covers standards like IEC (CB) and cULus.

Ready for IE3 motors

MBS manual motor starters comply with the latest IE3 N/H and NE/HE motors. NE/HE requires utilization category AC-3e.

MBS manual motor starters

The right accessories for your applications

Wide range of accessories

Various accessories like auxiliary contacts, signaling contacts, shunt trips, undervoltage releases as well as busbars are available to enhance the functionality of MBS manual motor starters.

Save wiring time
and avoid mistakes by
using a connecting link

Easy to connect

Save wiring time and avoid mistakes by using a connecting link between MBS manual motor starters and AEG contactors. This creates harmonious and compact starter combinations that are easy to mount.

With a lockable handle
maintenance will be safe
for every technician

Safety at work

With a lockable handle maintenance will be safe for every technician. MBS32NH and MBS63NH handles are lockable without additional accessories. Use MAS1 padlock adapter to make MBS32NG lockable.

MBS32NG manual motor starters

0.25 to 32 A – with thermal and electromagnetic protection

MBS32NG - 160

MBS32NG - 320

MBS32NG is a compact and economic range for motor protection up to 15 kW (400 V) / 32 A in width of 45 mm. Further features are the built-in disconnect function, temperature compensation, trip-free mechanism and a rotary handle with a clear switch position indication. The manual motor starter is suitable for three- and single-phase applications. Auxiliary contacts, signaling contacts, undervoltage releases, shunt trips and locking devices for protection against unauthorized changes are available as accessory.

MBS32NH-100

MBS32NH-320

MBS32NH is a compact and powerful range for motor protection up to 15 kW (400 V) / 32 A in width of 45 mm. This type has also a clear and reliable indication of fault in a separate window in the event of short-circuit tripping. Further features are the built-in disconnect function, temperature compensation, trip-free mechanism and a rotary handle with a clear switch position indication.

The manual motor starter is suitable for three- and single-phase applications. The handle is lockable to protect against unauthorized changes. Auxiliary contacts, signaling contacts, undervoltage releases, shunt trips, three-phase feeder terminals are available as accessory. These are suitable throughout the MBS32NG/ MBS32NH/MBS63NH range.

MBS manual motor starters with accessories

Accessories

MBS32NG, MBS32NH, MBS63NH

MAHN..FB

MAHN..LL

MAHN..LR

MBS32NG, MBS32NH, MBS63NH manual motor starters can be equipped with auxiliary contacts for lateral/ front mounting, signaling contacts for lateral mounting, undervoltage releases and shunt trips. The accessories can be fitted wiring free and without tools. A variety of combinations is possible as required for the application. The auxiliary contacts change position with the main contacts. The signaling contact MAHN..LR signals tripping regardless if it was caused by short-circuit or overload. Undervoltage releases are used for remote tripping of the manual motor starters, specially specially for emergency stop circuits. Shunt trips release the manual motor starters used for remote tripping.

Three-phase busbars

Three-phase busbars ensure a quick and safe connection and are therefore a cost effective solution. A variety of different three-phase busbars up to 65 A are in the assortment. Between 2 and 4 manual motor starters with none, one or two lateral auxiliary contacts can be connected. Different three-phase feeder terminals are available according to the application.

Suitable for	Rated operational current	Number of manual motor starters	Number of lateral auxiliary contacts	Type	Order code	Pkg qty	Weight (1 pce)

MI65-Y

MI65 are IP65 (NEMA Type 12) enclosures for single manual motor starter installation. Additional mounting of auxiliary and signaling contacts, shunt trips and undervoltage release is possible. The handle is lockable in OFF position. For detailed specification see installation instruction.

Suitable for	Description	Color	Type	Order code	Pkg qty	Weight (1 pce) kg
IP65 enclosures (NEMA Type 12)						
MBS32NG, MBS32NH	Padlockable max. 3 padlocks with bail diameter 4 ... 6.5 mm	Yellow/red	MI65-Y	4TQE569015R0000	1	0.370

MF32-AR

MF32N-AH

With this solution of door coupling rotary mechanisms it is possible to operate manual motor starters in the back of a switch cabinet from outside. The door coupling mechanism prevents opening of the door of a switch cabinet with the manual motor starter in ON position.

The complete mechanism includes handle, shaft, driver, shaft alignment ring and shaft supporter.

Most accessories fit for 6 mm shafts with a maximum length of 180 mm. The degree of protection for handles MA32NH is IP64 (NEMA Type 1, 3R, 12).

Suitable for	Description	Color	Type	Order code	Pkg qty pce	Weight (1 pce) kg
IP64 handles (NEMA Type 1, 3R, 12)						
MBS32NG, MBS32NH, MBS63NH	Padlockable max. 3 padlocks with bail diameter 5 ... 8 mm, door interlock in ON position defeatable, for use with PL1xx-MA32 shafts.	Black	MA32NHB ⁽¹⁾	4TQE569060R0000	1	0.065
		Yellow	MA32NHR ⁽¹⁾	4TQE569061R0000	1	0.065
Driver						
MBS32NG, MBS32NH, MBS63NH	Coupling driver for use with PL1xx-MA32 shafts from 6mm up to 180mm.		MF32-MN ⁽²⁾	4TQE569062R0000	1	0.002
			MF32-MNO ⁽³⁾	4TQE569063R0000	1	0.002
Shaft alignment ring						
MBS32NG, MBS32NH, MBS63NH	The MF32-AR supports the long shafts for alignment to the handle inlet. It makes closing panel doors more easy.		MF32-AR	4TQE569064R0000	1	0.010
Shaft supporter						
MBS32NG, MBS32NH	With the MF32N-AH it is possible to support the shaft in the extension of handle (MA32NH). It is mandatory for the usage of shafts >130 mm.		MF32N-AH	4TQE569065R0000	1	0.035

(1) Indication I-O and ON-OFF (recommended for MBS32NG)

(2) Coded - Positioning of ON indication dependent on mounting orientation of the MBS

(3) Uncoded - Positioning of ON indication independent of mounting orientation of the MBS.
